

# Schindler 3000 Plus (AP)

Stylish, functional and flexible

# Schindler modernization solutions

## Keeping passengers moving

We're using our globally renowned expertise to provide you with the very best elevator modernization solutions. Our Swiss-precision engineering and proven systems improve the reliability, safety, performance and aesthetics of your elevator – increasing your building's overall value.

### Benefit from latest technologies

Our replacement elevators allow your passengers not only to enjoy noticeably smoother, quieter operation but also another level of passenger experience thanks to digitally enhanced mobility. Residents and tenants will appreciate the additional comfort and convenience your modernization brings to their life. Enjoy seamless mobility with no complaints.

## Minimal downtime and disruption

Our global competencies and expertise make it sure to minimize building adaptations and optimize the installation process when replacing your elevator, setting new standards in the field. In fact, installing our replacement elevators requires up to 40% less time than a conventional replacement. That means that residents can look forward to minimum disturbance and downtime, and you can enjoy a professional and hassle-free process from ordering to handover.

## Improved safety and code compliance

Safety is a top priority at Schindler. Our new, modular-platform product range ensures improved safety for customers, visitors, residents and passengers. Our elevator systems meet the latest EU safety requirements and is EC type-certified according to the latest regulations (New Lifts Directive 2014/33/EU, European lifts standards EN 81-20/50, European standard EN 81-21 for new lifts in existing buildings, and optionally European standard EN 81-70 regarding accessibility to lifts for persons with disabilities).

# Schindler 3000 Plus

## Stylish, functional and flexible

Schindler 3000 Plus is made to be flexible in every way and fits perfectly in your building. Tailored to multiple applications in any urban environment, it will give your building a new lease on life, increasing its value and functionality. Select from a full spectrum of styles, colors and options to find the best possible match for your building.

Schindler 3000 Plus is part of Schindler's new modular-platform replacement product range for residential and commercial buildings worldwide, from low-rise to mid-rise and from basic to sophisticated requirements.

### Key figures

<b>Capacity</b>	320–1150 kg
<b>Travel height</b>	Up to 75 m
<b>Stops</b>	Max 25 stops
<b>Speed</b>	1.0 – 1.75 m/s
<b>Drive system</b>	Machine-room-less, eco-friendly regenerative drive technology, frequency controlled
<b>Group size</b>	Up to 8 cars
<b>Entrances</b>	One- or two-sided
<b>Interior</b>	3 interior design lines, fresh wall colors and wide range of fixtures, and bare car option
<b>Energy efficiency classification</b>	Class A, according to ISO 25745-2*

### Designed to fit – built to last

Engineered to Swiss standards for 24/7 operation and for a perfect fit.

### Outstanding flexibility

The widest range of applications and maximum flexibility in car dimensions along with door sizes and position.

### Future ready

Elevators designed to interface with next-generation technologies.

### PORT Technology

Optionally, an integrated building security access solution with increased elevator efficiency and comfort.

### Multiple design options

Three full-design lines to complement your building interior, or choose your own design.

# Outstanding flexibility

## The best use of space

Schindler 3000 Plus has outstanding architectural flexibility for car, door and shaft dimensions. Less space taken up by components means more room and comfort for your passengers.

### Machine-room-less design

All the main drive, traction and control equipment sits in the shaft, leaving the machine room space free for other uses, and making it easy to extend lift access to the top floor thanks to the reduced headroom requirement.

### Reduced headroom

The system is designed to require minimal headroom in order to fit in the existing shaft headroom.

### Smaller motor and traction sheave

Suspension Traction Media (STM) saves shaft space and energy by using a smaller motor and sheave.

### Built-in controller on landing door

The Schindler 3000 Plus controller panel is integrated into the landing door frame, for simple installation and maintenance access. Optionally, the controller can be installed on other floors as well as in another place near the shaft or in the former machine room.

### Modular system, scalable car and door dimensions

We can adjust car width and depth for you in 10 mm increments. Schindler 3000 Plus car width can range from 660 mm to 2000 mm, car depth from 860 mm to 2400 mm, and clear car height right up to 2600 mm, in 50 mm steps. Doors can be positioned with millimeter accuracy.

### Reduced pit depth

Minimal pit depth requirement to fit in the existing shaft pit

# Flexible Door Dimensions

## Adaptable to any space

Avoiding changes to the landing walls and floor is very important when replacing an elevator. Schindler 3000 Plus offers a large variety of door types and layouts to fit the existing space perfectly, eliminating the need for modifications and resulting in easy installation.

### Door types and dimensions

The door width is adjustable in 100mm increments from 600 mm to 1200 mm, and the height from 2000 mm to 2400 mm in 50 mm increments with a choice of telescopic (T2) or center-opening doors (C2, C4) for single or double entrance (through-loading). For specific cases a flat symmetric or asymmetric C4 panel door is also available.

### Metal front

Metal extension fronts combined with the landing doors are also available to partially or fully cover the landing shaft front.

### Frameless landing doors

As an alternative to standard box-framed landing doors, frameless doors (which reuse existing landing frames) are also available to preserve the existing finishing of your landing.

# Future-ready

## Schindler elevators designed for next-generation technologies

Our Schindler RePlace elevators allow your passengers not only to enjoy noticeably smoother and quieter operation, but also another level of passenger experience thanks to digitally enhanced mobility. A modernization introduces leading technologies, such as intelligent electronic diagnostics, to further support the management and maintenance of your equipment into the future.

### Plan & Design online

Find the right design for your elevator. Our online **Plan & Design Tool** allows you to test out different wall colors, ceiling types, etc. to find the perfect match for your existing lobby design.

### Innovations in installation

Schindler's new **INEX (Installation Excellence)** method not only reduces construction preparation and resources for our customers, it also improves safety and efficiency on site.

Our autonomous self-climbing robot system – **Robotic Installation System for Elevators (Schindler R.I.S.E.)** – will enhance quality and speed of construction while maintaining safety on site in the near future.

### Smart operation – switching to digital

All our new elevators are fully enabled for **Schindler Ahead** – our IoT (Internet of Things) portfolio of services. With Schindler Ahead, we make sure that our customers can step confidently into the digital era.

#### – Maximize uptime with Ahead Remote Monitoring

With digital connectivity, issues can be detected and addressed well before service is affected. This helps facilities take timely action to minimize downtime.

#### – Real-time insights with Ahead ActionBoard

Ahead ActionBoard provides operational, performance and commercial information in real time, giving customers clear, instant oversight of their entire elevator and escalator portfolio.

Elevator planning and design in minutes with Schindler Plan & Design Tool

Innovations to help seamless installation – meet Schindler R.I.S.E.

Real-time insights with Ahead ActionBoard

Improve elevator traffic management in your building by up to 50% with Schindler's PORT Technology

# Navona

## Functional and durable

Clarity and comfort in your car with this robust design line. Fresh colors, durable accessories, and the option of several different floors make Navona an excellent choice for residential applications. Elegant stainless steel options are also available for rear and side walls.

### Navona

Lighting: Round Spots  
Ceiling: Stainless Steel Hairline

# Park Avenue

## Sophisticated and elegant

A touch of class. Wooden and textured laminates or back-painted glass walls create a rich, contemporary ambiance. Or, you can create a luxury feel with stainless steel in different finishes or decorative glass. Matched lighting completes Park Avenue's elegance.

### Park Avenue

# Mirrors

## Ensuring optimal appearance

Mirrors heighten the sense of space, depth, and comfort in elevators – and provide a vital service for passengers. Your elevator can be fitted with a full-height or half-height safety-glass mirror on the side or rear wall of the car.

### Side Wall

**Full height  
centered**

### Rear Wall

**Half height  
centered**

**Full height  
centered**

# Handrails

## A wide choice of shapes and finishes

Handrails convey a feeling of security. Schindler stainless steel handrails are designed to blend with car interiors, shapes and textures, and can be mounted to the side and rear walls. Available in curved, straight, straight with curved ends, and revolving layouts.

Straight with curved ends  
Stainless Steel Hairline

Curved  
Painted White Aluminum

### Customize your handrails

Handrails convey a feeling of security. Our handrails are designed to blend with car interiors, shapes and textures.

The handrails can be mounted in different combinations of side and rear walls, either only one handrail piece on the rear or side walls, two handrail pieces on the side walls or handrails on three walls. They can be connected straight or revolving.

Choose the handrail shape you prefer:

Straight, straight with curved ends, or curved.
