

# Schindler 5000 (EU)

Striking, flexible, and effective

With a Schindler 5000,  
enjoy a perfect blend of

# form, function, and flexibility

Faster, smoother – and greener.

Swiss-engineered for excellence, Schindler 5000 integrates the latest technologies with outstanding architectural flexibility – all with optimal ride quality and energy efficiency. Car and door dimensions can be adjusted for a perfect fit in your building.

# Schindler 5000

## Striking, flexible, and effective

Schindler 5000 offers superior flexibility and striking interior options for commercial and high-end residential projects. With a maximum travel up to 80 meters, speeds up to 2.5 m/s, and a capacity of up to 1350 kilograms, it can be tailored to a multitude of applications.

Schindler 5000 integrates the latest technology, high quality materials, and energy-efficient features to bring passengers to their final destination smoothly and efficiently.

### Key figures

<b>Capacity</b>	630 to 1350 kg
<b>Travel height</b>	Max 80 m
<b>Stops</b>	Up to 40 stops (Maximum of 33 stops on one side, maximum of 50 openings)
<b>Speed</b>	1.0 to 2.5 m/s
<b>Machine room</b>	Machine-room-less
<b>Drive system</b>	Frequency controlled, eco-friendly regenerative drive technology
<b>Group size</b>	Up to 8 cars
<b>Entrances</b>	One- or two-sided
<b>Energy efficiency classification</b>	Class A, according to ISO 25745-2*

\*The classification always refers to a specific configuration. Usage pattern, load capacity, customer specific options and site conditions influence the final rating.

### High-quality – at every level

Contact-free sensors assure millimeter-precise leveling with the floor for safe, seamless movement of passengers in and out of the elevator.

### Future-ready

Elevators designed today to interface with next-generation technologies.

### Architectural flexibility

The widest range of applications, plus maximum flexibility in car and shaft dimensions.

### Efficiency and ecology

Architecturally – and environmentally-friendly. Schindler 5000 is equipped with regenerative drive technology, as standard.

### Make a statement

Four design lines to complement your building interior or chose your own design.

# Future-ready

## Schindler elevators designed for next-generation technologies

Our elevators are designed to use state-of-the-art technologies from planning to operation. Benefit from our tools, solutions, and latest innovations that have been designed to support you through the entire life cycle of your elevator.

### Plan & Design online

With just a few clicks, you can plan the right elevator for your building. Our online **Plan & Design Tool** provides you with recommendations, comprehensive product specifications and detailed layout drawings and **Building Information Modeling (BIM)** files.

### Innovations in installation

Schindler's new **INEX (Installation Excellence)** method not only reduces construction preparation and resources for our customers, it also improves safety and efficiency on site.

Our **Schindler CLIMB Lift** is a certified self-climbing vertical transportation system that is used during construction. It contributes to higher productivity on the jobsite and can later serve as a permanent elevator.

Our autonomous self-climbing robot system – **Robotic Installation System for Elevators (Schindler R.I.S.E.)** – will enhance quality and speed of construction while maintaining safety on site in the near future.

### Smart operation – switching to digital

All our new elevators are fully enabled for **Schindler Ahead** – our IoT (Internet of Things) portfolio of services. With Schindler Ahead, we make sure that our customers can step confidently into the digital era.

#### – Maximize uptime with Ahead Remote Monitoring

With digital connectivity, issues can be detected and addressed well before service is affected. This helps facilities take timely action to minimize or even avoid downtime. Schindler Ahead maximizes uptime thanks to instant, accurate insights.

#### – Real-time insights with Ahead ActionBoard

Ahead ActionBoard provides operational, performance and commercial information in real time, giving customers clear, instant oversight of their entire elevator and escalator portfolio.

Elevator planning and design in minutes with Schindler Plan & Design Tool

Innovations to help seamless installation – meet Schindler R.I.S.E.

Real-time insights with Ahead ActionBoard

Improve elevator traffic management in your building by up to 50% with Schindler's PORT Technology

# Elevating sustainability

## Excellent ecological performance

We're committed to improving the environmental impact of our products and services continuously, across their entire life cycle. The Schindler 5000 has been designed to save both space and energy. From the first sketches in design, right through to disposal and recycling, environmental assessment considerations are an integral part of the Schindler product development process.

### Class A energy-efficiency rating

Improving energy efficiency is essential in order to reduce the environmental impact of elevators and the buildings they serve. Regenerative drive, LED lighting and stand-by mode while parked, are standard eco-friendly features in all Schindler 5000 elevators, aiming to achieve the highest energy-efficiency rating class A, according to ISO 25745-2\*.

### Environmental Product Declarations (EPD)

To provide an insight into the ecological performance of our elevators throughout their life, we provide Environmental Product Declarations (EPD). We've registered EPDs at the "International EPD® System" for all major elevator product lines. This is an important step in the assessment of the environmental performance of our products and underlines our continuous efforts toward sustainable solutions.

Energy-efficiency rating  
class A, according to  
ISO 25745-2\*

\*The classification always refers to a specific customer configuration.  
Usage pattern, load capacity, customer specific options and site  
conditions influence the final rating.

# Efficiency and ecology

## Architecturally and environmentally-friendly

Our Schindler 5000 is designed to blend seamlessly into your building. Flexible car sizes, door dimensions, and controller options enable the Schindler 5000 to adapt to any project. Make your building more efficient with leading energy-saving features.

### 1 Machine-room-less design

- The Schindler 5000 is available in a space-saving machine-room-less (MRL) design

### 2 Energy-efficient machine

- Lubrication-free, gearless machine supports a smooth ride quality
- Permanent magnet technology offers higher energy efficiency
- Stable start without high peak current, quickly reaches a low energy consumption level

### 3 Regenerative inverter as standard

- Minimum heat dissipation due to energy recuperation. This minimizes energy consumption and helps keep the components at the top of the hoistway cool.
- Return of regenerated energy to main power during overhauling mode
- Minimal reactive power thanks to the use of a Power Factor 1 converter

### 4 Future-ready controller

- Reduced stand-by power improves energy efficiency
- Halogen-free cabling and wiring, available as an option
- Precision stopping accuracy for easy access
- Digitally-enabled for remote maintenance and commissioning to meet the highest quality standards

### 5 Modular, scalable system

- Scalable car sizing in any direction, in 50 mm increments
- Car heights up to 2800 mm, scalable in 100mm increments
- Doors can be sized and positioned with millimeter accuracy
- The door width is adjustable in 100 mm increments from 800 to 1200 mm and door height up to 2400 mm, with a choice of telescopic (T2) or center-opening doors (C2) and single or double (through-loading)

### 6 Hoistway and suspension technology

- STM technology enables a smaller machine compared to conventional steel rope applications
- Compared to steel ropes, the STM is oil-free and does not require regular lubrication

Enjoy a  
**high ride  
quality**

with the  
Schindler 5000

The sound of  
moderate rainfall

Thanks to our high-quality technology and installation methodologies, Schindler elevators generate minimal noise. Most of the noise created by our elevators does not exceed 50 – 60 dB (A).\*

\*For the evaluation methodology, we comply with ISO 18738 standards. However, many factors influence the amount of noise and vibration generated by an elevator. See our Ride Quality brochure to learn more.

**Find your style** – From functional to sophisticated, pre-configured to custom, our striking interior design options offer unparalleled flexibility to complement the most stylish and **innovative interior architecture concepts.**

**Navona**  
Functional and durable

**Times Square**  
Modern and versatile

## Four design lines Infinite possibilities

Create the look and feel you like. Combine colors, materials, lighting, mirrors, handrails, and fixtures to achieve the ambiance that fits your building. Choose from one of our interior design lines or design an individual car that fits your needs.

# Navona

## Functional and durable

Clarity and comfort in your car with this robust design line. Fresh colors, durable accessories, and the option of several different floors make Navona an excellent choice for residential applications. Elegant stainless steel options are also available for rear and side walls.

### Navona

Lighting: Round spots  
Ceiling: Stainless Steel Lucerne Brushed  
Walls: Stainless Steel Lucerne Brushed

# Mirrors

## Ensuring optimal appearance

Mirrors heighten the sense of space, depth, and comfort in elevators – and provide a vital service for passengers. Your elevator can be fitted with a full-height or half-height safety-glass mirror on the side or rear wall of the car.

### Side Wall

Full height last panel left and/or right

### Rear Wall

Half height full width

Half height centered

Full height middle panel

Full height left or right panel

### Park Avenue

Back Painted Glass, Shanghai Red  
Full height left and right panel

# Glass

## Expanding a small space

Glass walls offer the illusion of space to improve the comfort of passengers. They also leverage natural lighting, enhance security and offer a visually engaging experience by bringing the outside in. Robust safety glass is available for the walls and doors of your elevator.

**Glass rear wall**

**Glass side walls**

**Glass door**

**Partial side walls**

**Partial side walls**

\*Glass options can be combined to achieve a distinctive look

# Handrails

## A wide choice of shapes and finishes

Handrails convey a feeling of security. Schindler stainless steel handrails are designed to blend with car interiors, shapes and textures, and can be mounted to the side and rear walls. Available in curved, straight, straight with curved ends, and revolving layouts.

### Customize your handrails

Handrails convey a feeling of security. Our handrails are designed to blend with car interiors, shapes and textures.

The handrails can be mounted in different combinations of side and rear walls, either only one handrail piece on the rear or side walls, two handrail pieces on the side walls or handrails on three walls. They can be connected straight or revolving.

Choose the handrail shape you prefer:

Straight, straight with rounded ends, or curved

- 01 Stainless Steel Montreux Mirror (only available with the curved handrail)
- 02 Stainless Steel Lucerne Brushed

Sunset Boulevard

# Schindler PORT Technology

## Best-in-class traffic management

Optimize the way people move around your building. Improve efficiency, reduce energy consumption, and create more satisfying experiences with Schindler PORT – a holistic solution to building transit management.

Schindler PORT provides a wide range of destination control and access terminals for visitor management, parking, doors, offices and residences. Combine terminals to produce an aesthetic and functional solution for any building.

### Personalized experiences

Customize user journeys based on individual needs and access rights. User-friendly, high-resolution interfaces and touchless operations enhance the experience for passengers.

### Highly efficient people flow

Especially suited to large elevator groups or straight-line configurations in heavy-traffic commercial buildings, Schindler PORT can increase handling capacity by up to 25% and reduce waiting times by up to 20%.

### Secure access

Pre-program and control elevator, floor, and room access rights for tenants and visitors from a central location. Lobby speed gates take identification and access control to new heights of efficiency.

Learn more about  
PORT Technology

[www.schindler.com/port](http://www.schindler.com/port)

## myPORT

Schindler myPORT is the comprehensive building transit application that puts the power of Schindler PORT Technology into the hands of residents and tenants – in one smartphone app.

Schindler myPORT provides appropriate levels of building access from main entrances and parking garages to offices and apartment doors. For visitors, it's hospitality at its best with a digital invitation giving simple entry and guidance. Occupants can communicate directly with visitors via Schindler myPORT's video intercom system.

## Sustainable operation

Elevator energy consumption can be reduced by up to 40%\* with Schindler PORT ECO Mode. Schindler PORT can also help reduce the energy usage per capita by up to 20%\* - making the solution a smart one for your building and the environment.

\*Calculations are in comparison to prior Schindler PORT Technology software releases and refer to a specific customer configuration. Usage patterns, load capacity, customer specific options and site conditions may influence the final calculations.

# Schindler PORT

## Best-in-class traffic management

### Schindler PORT

All Schindler 5000 elevators are fully enabled for Schindler PORT Technology, with all the advantages of reduced travel time in elevators, higher passenger traffic capacity, and the potential for full building security and personalized access.

Schindler PORT technology – our destination dispatch system – can be installed in place of conventional fixtures on each landing to optimize the performance of an elevator group.

# Installation and service excellence

## Working with you every step of the way

### Transparent fulfillment process

For more than a century, we've have focused on supporting our customers across all stages of the project. From design and installation, through to service and modernization, our professionals are there for you, at all times. We partner with you to find the best mobility solution for your facility.

We will consult with you prior to the offer and throughout the manufacturing and installation process to address any unforeseen challenges. A detailed inspection will be performed before we hand over the elevator to verify that the unit meets our high quality standards.

Our aim is to ensure the delivered and installed Schindler 5000 perfectly fits your needs.

### A new era of service for elevators

With a new Schindler 5000, your equipment becomes easier to service and troubleshoot thanks to the latest digital technologies. And with more than 40,000 experts around the world, we strive to ensure every Schindler customer enjoys industry-leading uptime with minimal disruption.

Remote monitoring and automatic fault resolution are ready to be enabled in your Schindler 5000 elevator. A newly connected elevator supports 24/7 intelligent auto callback service and maintenance. This can reduce downtime by up to 34%\*.

\*Compared to non-connected units.
