

Schindler 5000 Plus

A RePlace solution for your existing elevator

With a Schindler 5000 Plus,
enjoy a perfect blend of

form, function, and flexibility

Faster, smoother – and flexible.

Swiss-engineered for excellence, Schindler 5000 Plus replaces your existing elevator. Integrating the latest technologies, **it delivers optimal ride quality and energy efficiency.** With outstanding architectural adaptability, car and door dimensions can be adjusted for **a perfect fit in your established building.**

Schindler RePlace

Modernization solutions to keep passengers moving

With almost 150 years designing, manufacturing, and installing elevators, we understand how to transport people and loads safely and reliably. Our experience helps us understand and address the particular requirements and the unique challenges that an elevator modernization presents. With Schindler, enjoy the hassle-free and efficient modernization of your existing equipment.

Swiss-precision engineering

Like any technical product, elevators are also subject to a life cycle. Elevator equipment and components will eventually wear down, requiring upgrades to maintain the performance and reliability of the system. We're using our Swiss-precision engineering and globally renowned expertise to provide you with the best elevator modernization solutions.

New elevator, existing hoistway

A Schindler RePlace modernization introduces a completely new elevator into the existing hoistway space.

By fully replacing your existing system, your building benefits from the latest safety standards and leading energy-efficient technologies, allowing you to reduce your carbon footprint and energy costs. And, passengers benefit from a new, fresh elevator.

Enjoy peace of mind

A Schindler RePlace not only increases the reliability and performance of your existing elevator, it also adds value to your existing investment. Maintenance-friendly components and the replacement of obsolete parts reduce the likelihood of equipment downtime. Let us give you peace of mind with our Schindler RePlace elevators.

Solutions for every building

Our Schindler 5000 Plus is just one of our RePlace elevator solutions.

We have several Schindler RePlace options available – the Schindler 1000 Plus, Schindler 3000 Plus, Schindler 5000 Plus, or Schindler 6000 Plus – to meet the requirements of your specific building and the existing equipment.

From design and installation, through to service and modernization, our professionals are there throughout the entire life cycle of your elevator.

Repair or modernization? Giving your elevator new life

Assessing your elevator

In contrast to a repair, which offers a 1:1 replacement of components, a modernization upgrades components and brings your elevator to a higher standard. The latest regulations, introduced to make your elevator as safe as possible, can be easily met with a Schindler RePlace elevator.

After commissioning, regular maintenance, and repairs, a Schindler modernization will help ensure that your elevators continue to perform optimally for years to come.

Minimize unpredictability

A Schindler RePlace modernization addresses the unreliability and unpredictability associated with older installations, so passengers can enjoy a smooth and uninterrupted journey to their destination. Replacing an obsolete system safeguards against unnecessary downtime due to spare part unavailability – maximizing uptime in the future.

For equipment that is over 30 years old, a Schindler RePlace elevator – the Schindler 1000 Plus, Schindler 3000 Plus, Schindler 5000 Plus, or Schindler 6000 Plus – should be considered to maintain the availability of spare parts, improve equipment performance, and preemptively upgrade components that are reaching the end of their life.

Keep passengers moving smoothly, efficiently, and comfortably with a Schindler RePlace modernization

Schindler 5000 Plus

Striking, flexible, and effective

Schindler 5000 Plus offers superior flexibility and striking interior options for commercial and high-end residential renovation projects. With a maximum travel up to 80 meters, speeds up to 2.5 m/s, and a capacity of up to 1360 kilograms, it can be tailored to a multitude of applications to help give your old building new life.

Schindler 5000 Plus integrates the latest technology, high quality materials, and energy-efficient features to bring passengers to their final destination smoothly and efficiently.

Key figures

Capacity	630 to 1350 kg
Travel height	Max 80 m
Stops	Up to 40 stops (Maximum of 33 stops on one side, maximum of 50 openings)
Speed	1.0 to 2.5 m/s
Machine room	Machine-room-less
Drive system	Frequency controlled, eco-friendly regenerative drive technology
Group size	Up to 8 cars
Entrances	One- or two-sided, on opposite sides
Energy efficiency classification	Class A, according to ISO 25745-2*

*The classification always refers to a specific configuration. Usage pattern, load capacity, customer specific options and site conditions influence the final rating.

Future-ready

A modernization introduces the latest digital innovations and new technologies to further support the management and maintenance of your equipment into the future.

Architectural flexibility

The widest range of applications, plus maximum flexibility in car and shaft dimensions to fit within the existing hoistway space.

Efficiency and ecology

Architecturally – and environmentally-friendly. Schindler 5000 Plus is equipped with regenerative drive technology, as standard.

Make a statement

Four design lines to complement your existing building interior or chose your own design.

Future-ready

Schindler elevators designed for next-generation technologies

Our Schindler RePlace elevators allow your passengers not only to enjoy noticeably smoother and quieter operation, but also another level of passenger experience thanks to digitally enhanced mobility. A modernization introduces leading technologies, such as intelligent electronic diagnostics, to further support the management and maintenance of your equipment into the future.

Plan & Design online

Find the right design for your elevator. Our online **Plan & Design Tool** allows you to test out different wall colors, ceiling types, etc. to find the perfect match for your existing lobby design.

Innovations in installation

Schindler's new **INEX (Installation Excellence)** method not only reduces construction preparation and resources for our customers, it also improves safety and efficiency on site.

Our autonomous self-climbing robot system – **Robotic Installation System for Elevators (Schindler R.I.S.E.)** – will enhance quality and speed of construction while maintaining safety on site in the near future.

Smart operation – switching to digital

All our new elevators are fully enabled for **Schindler Ahead** – our IoT (Internet of Things) portfolio of services. With Schindler Ahead, we make sure that our customers can step confidently into the digital era.

– Maximize uptime with Ahead Remote Monitoring

With digital connectivity, issues can be detected and addressed well before service is affected. This helps facilities take timely action to minimize downtime.

– Real-time insights with Ahead ActionBoard

Ahead ActionBoard provides operational, performance and commercial information in real time, giving customers clear, instant oversight of their entire elevator and escalator portfolio.

Elevator planning and design in minutes with Schindler Plan & Design Tool

Innovations to help seamless installation – meet Schindler R.I.S.E.

Real-time insights with Ahead ActionBoard

Improve elevator traffic management in your building by up to 50% with Schindler's PORT Technology

Elevating sustainability

Excellent ecological performance

We're committed to improving the environmental impact of our products and services continuously, across their entire life cycle. The Schindler 5000 Plus has been designed to save both space and energy. From the first sketches in design, right through to modernization, disposal, and recycling, environmental assessment considerations are an integral part of the Schindler product development process.

Class A energy-efficiency rating

Improving the energy efficiency of older buildings is vital to the development of more sustainable cities. Modernizing your existing elevator can help reduce the environmental impact of this equipment in the buildings they serve. Regenerative drive, LED lighting, and stand-by mode while parked are standard eco-friendly features in all Schindler 5000 Plus elevators, aiming to achieve the highest energy-efficiency rating class A, according to ISO 25745-2*.

Environmental Product Declarations (EPD)

To provide an insight into the ecological performance of our elevators throughout their life, we provide Environmental Product Declarations (EPD). We've registered EPDs at the "International EPD® System" for all major elevator product lines. This is an important step in the assessment of the environmental performance of our products and underlines our continuous efforts toward sustainable solutions.

Energy-efficiency rating
class A, according to
ISO 25745-2*

*The classification always refers to a specific customer configuration.
Usage pattern, load capacity, customer specific options and site
conditions influence the final rating.

Efficiency and ecology

Architecturally and environmentally-friendly

Our Schindler 5000 Plus is designed to blend seamlessly into your existing building. Flexible car sizes, door dimensions, and controller options enable the Schindler 5000 Plus to work within the existing hoistway. This helps minimize the need for additional work and the disruption for your tenants.

1 Machine-room-less design

- The Schindler 5000 Plus is available in a space-saving machine-room-less (MRL) design

2 Energy-efficient machine

- Lubrication-free, gearless machine supports a smooth ride quality
- Permanent magnet technology offers higher energy efficiency
- Stable start without high peak current, quickly reaches a low energy consumption level

3 Regenerative inverter as standard

- Minimum heat dissipation due to energy recuperation. This minimizes energy consumption and helps keep the components at the top of the hoistway cool
- Return of regenerated energy to main power during overhauling mode
- Minimal reactive power thanks to the use of a Power Factor 1 converter

4 Future-ready controller

- Reduced stand-by power improves energy efficiency
- Halogen-free cabling and wiring, available as an option
- Precision stopping accuracy for easy access
- Digitally-enabled for remote maintenance and commissioning to meet the highest quality standards

5 Modular, scalable system

- Scalable car width and depth, in 50 mm increments
- Car heights up to 2800 mm, scalable in 100mm increments
- Doors can be sized and positioned with millimeter accuracy
- The door width is adjustable in 100 mm increments from 800 to 1200 mm and door height up to 2400 mm, with a choice of telescopic (T2) or center-opening doors (C2) and single or double (through-loading)

6 Hoistway and suspension technology

- STM technology enables a smaller machine compared to conventional steel rope applications
- Compared to steel ropes, the STM is oil-free and does not require regular lubrication

Enjoy a
**high ride
quality**

with the
Schindler 5000 Plus

The sound of
moderate rainfall

Thanks to our high-quality technology and installation methodologies, Schindler elevators generate minimal noise. Most of the noise created by our elevators does not exceed 50 – 60 dB (A).*

*For the evaluation methodology, we comply with ISO 18738 standards. However, many factors influence the amount of noise and vibration generated by an elevator. See our Ride Quality brochure to learn more.

Schindler PORT Technology

Best-in-class traffic management

Optimize the way people move around your building. Improve efficiency, reduce energy consumption, and create more satisfying experiences with Schindler PORT – a holistic solution to building transit management.

A Schindler PORT upgrade can be implemented as the first step of a more comprehensive modernization to achieve smart mobility in a minimum amount of time. Customers will experience an immediate improvement in traffic flow, even if one car is out of service for the modernization.

Personalized experiences

Customize user journeys based on individual needs and access rights. User-friendly, high-resolution interfaces, and touchless operations enhance the experience for passengers.

Highly efficient people flow

Especially suited to large elevator groups or straight-line configurations in heavy-traffic commercial buildings, Schindler PORT can increase handling capacity by up to 25% and reduce waiting times by up to 20%.

Secure access

Pre-program and control elevator, floor, and room access rights for tenants and visitors from a central location. Lobby speed gates take identification and access control to new heights of efficiency.

Learn more about
PORT Technology

www.schindler.com/port

myPORT

Schindler myPORT is the comprehensive building transit application that puts the power of Schindler PORT Technology into the hands of residents and tenants – in one smartphone app.

Schindler myPORT provides appropriate levels of building access from main entrances and parking garages to offices and apartment doors. For visitors, it's hospitality at its best with a digital invitation giving simple entry and guidance. Occupants can communicate directly with visitors via Schindler myPORT's video intercom system.

Sustainable operation

Elevator energy consumption can be reduced by up to 40%* with Schindler PORT ECO Mode. Schindler PORT can also help reduce the energy usage per capita by up to 20%* - making the solution a smart one for your building and the environment.

*Calculations are in comparison to prior Schindler PORT Technology software releases and refer to a specific customer configuration. Usage patterns, load capacity, customer specific options and site conditions may influence the final calculations.

Schindler PORT Overlay

A seamless and hassle-free modernization

Schindler PORT

Schindler PORT technology – our destination dispatch system – can be installed in place of conventional fixtures on each landing to optimize the performance of an elevator group.

Schindler PORT provides a wide range of destination control and access terminals for visitor management, parking, doors, offices, and residences. Combine terminals to produce an aesthetic and functional solution for any building.

Modernization and service excellence

Working with you every step of the way

Transparent fulfillment process

We partner with you to find the best mobility solution for your facility. By checking the health of your existing equipment, we can determine what solution and components are the best fit for your installation.

To ensure a smooth installation process, we'll meet with you a few weeks before the modernization starts to discuss the final program of work. We'll also clarify storage and access points, and coordinate our activities with any subcontractors on-site so you can enjoy a professional and hassle-free process from ordering to handover.

Efficient installation and future maintenance

Our global competencies and expertise make it sure to minimize building adaptations and optimize the installation process when replacing your elevator, setting new standards in the field. In fact, installing our replacement elevators requires up to 40% less time than a conventional replacement. That means that residents can look forward to minimum disturbance and downtime.

After a Schindler RePlace modernization, your equipment becomes easier to service and troubleshoot. The newly connected elevators enable 24/7 intelligent auto callback service and maintenance. This can reduce downtime by up to 34%*.

*Compared to non-connected units.

Schindler modernization

Various solutions to meet your needs

Are you interested in replacing your elevator with a completely new system? Or, maybe you would like to upgrade individual components? Either way, we have the solution that's right for you.

We have developed various modernization solutions to target the differing age, technical needs, and usage of elevators in operation today. A Schindler RePair addresses individual components on an as needed basis. A Schindler ReStore targets the electrical system to enable the latest technologies. Alternatively, a ReNew upgrades the critical electrical, and mechanical components, such as the machine, to deliver a smooth, safe and energy-efficient ride. While, a Schindler RePlace introduces a brand new elevator into your existing hoistway.
