We Elevate

**Schindler**

## We Elevate... Healthcare

Specifically designed for healthcare, retirement and spa facilities, our bed elevator is reliable, durable and attractive. It's also spacious enough to hold both patients and equipment at the same time. **We offer special control options for emergency services and cleaning staff.**

# High-tech and high comfort for patients and professionals

Our elevators deliver patients and their guests to their destinations in safe, quiet, smooth and reliable comfort.

**Reliable operation.** We understand that reliability is paramount when it comes to designing mobility solutions for healthcare facilities. Our elevators hold beds, staff and medical equipment. Access control prioritizes operation for emergency elevators and can designate selected elevators for trauma units and hygiene-sensitive transport.

**Hygienic design.** Elevator surfaces are durable, have no sharp edges and are made of easy-to-clean stainless steel. The in-car control panel can be positioned flexibly to maximize ease of use.

**Sustainable technology.** To provide an insight into the ecological performance of our elevators throughout their life, we provide Environmental Product Declarations (EPD). Schindler has registered EPDs at the "International EPD® System" for all major elevator product lines, taking an important step further in the assessment of the environmental performance of our products, underlining our continuous efforts towards sustainable solutions.

**Fast response.** We design maintenance to keep your elevator in optimum operation throughout its working life. Our control system can link to your building management system for even faster response and control. And Schindler's comprehensive service network guarantees rapid response – a Schindler technician is never far away.

**Tailored applications.** Elevators for beds, medical equipment, staff, visitors and freight.

**Easy operation.** Control panels can be positioned lower to make them easy to use from a wheelchair.

**Durable design.** Interiors tested for robustness that withstands bumps and heavy use.

**Energy efficiency.** Technology and control options that can save up to 70% on energy during operation.

**Short installation times.** Smart design, experienced technicians and project management.

**Safety.** Our handover process exceeds official requirements.

**Service availability.** Optional 24/7 maintenance service available for hospitals.

**Operational diagnostics.** Remote monitoring solves problems before they occur.

**Worry-free modernization.** From complete replacements with minimal building adaptation to tailored phased modernization, we ensure maximum traffic capacity with minimum disturbance during modernization work.

## Code compliance

Elevators	EN 81-20/50	Safety requirements for the construction
	EN 81-70	Disabled access
	EN 81-71	Vandal resistance
	EN 81-72	Fire fighter compliance

# Products and packages

## Tailored for the healthcare sector
